

Laptop Replacement Information

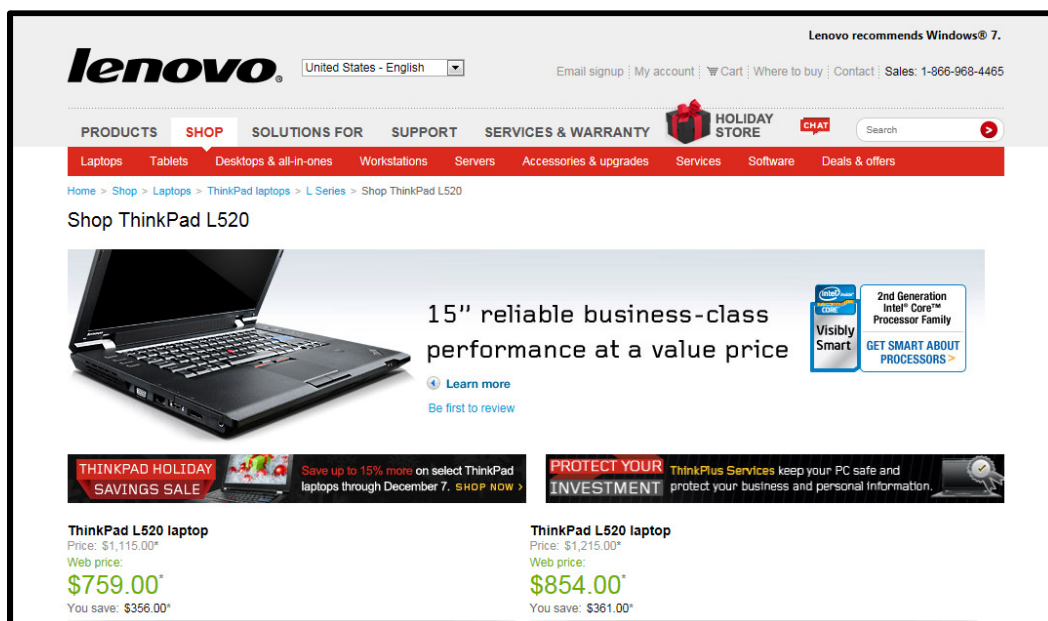

2012-13 Budget

The goal for the 2012-13 school year is to purchase 36 L520 Series Lenovo laptops – 29 for middle school faculty and instructional aides and seven machines that will be used for hot-swap spares, student teachers/interns and/or imaging duties.

Because the Physical Education staff tablets have reached their maximum usefulness as we cannot upgrade them to Windows 7, we will also purchase four X220 Series Lenovo convertible tablets, docking stations and necessary accessories for three middle/high school Physical Education teachers. One of the four machines will remain on the shelf for imaging duties and/or utilized as a spare. Lenovo has released a model of the X220 that is designed for outdoor use; therefore, we will most likely we will add an outdoor access point for use in the “green space”.

The existing middle school staff laptops will be refurbished with new batteries and placed in the middle school laptop carts for student use. The R52 laptops currently located in the carts will be wiped clean, loaded with the original Windows XP operating system and then offered for sale to staff with a 30/30 guarantee: 30 seconds or 30 feet out the door. The remainder will be offered to the general public. These particular machines are at the end of their useful life as they cannot be updated to Windows 7 and besides that, they use outdated power supplies and have a 4:3 ratio screen. Most computer currently utilize a 16:9 (or similar) widescreen format.
